Task Order Clauses

Federal Acquisition Regulation (FAR) clauses incorporated by reference		
52.209-10	**Prohibition on Contracting With Inverted Domestic Corporations**	(Nov 2015)
52.227-17	**Rights in Data—Special Works**	(DEC 2007)
52.217-8	**Option to Extend Services** fill-in: **30 days before the task order expires**	(Nov 1999)
52.232-39	**Unenforceability of Unauthorized Obligations**	(Jun 2013)
52.237-3	**Continuity of Services**	(Jan 1991)

Federal Acquisition Regulation (FAR) clauses incorporated in full text		

52.252-4   Alterations in Contract   (Apr 1984)

Portions of this contract are altered as follows:

Use of the word "contract" is understood to mean "task order" wherever such application is appropriate. Use of the word "solicitation" is understood to mean "fair opportunity notice" wherever such application is appropriate.

52.252-6   Authorized Deviations in Clauses   (Apr 1984)

(a) The use in this solicitation or contract of any Federal Acquisition Regulation (48 CFR Chapter 1) clause with an authorized deviation is indicated by the addition of "(DEVIATION)" after the date of the clause.

(b) The use in this solicitation or contract of any 52.203-99. Prohibition On Contracting With Entities That Require Certain Internal Confidentiality Agreements clause with an authorized deviation is indicated by the addition of "(DEVIATION)" after the name of the regulation.

**52.203-99   Prohibition On Contracting With Entities That Require Certain   (Jul 2016)
Internal Confidentiality Agreements (DEVIATION)**

(a) The contractor shall not require its employees or subcontractors seeking to report fraud, waste, or abuse to sign or comply with internal confidentiality agreements or statements prohibiting or otherwise restricting such employees or subcontractors from lawfully reporting waste, fraud, or abuse related to the execution of a government contract to a designated investigative or law enforcement representative of a Federal department or agency authorized to receive such information (e.g., agency Office of the Inspector General).

(b) The contractor shall notify current employees and subcontractors that prohibitions and restrictions of any internal confidentiality agreements covered by this clause, to the extent that such prohibitions and restrictions are inconsistent with the prohibitions of this clause, are no longer in effect.

(c) The prohibition in paragraph (a) of this clause does not contravene requirements applicable to Standard Form 312 (Classified Information Nondisclosure Agreement), Form 4414 (Sensitive Compartmented Information Nondisclosure Agreement), or any other form issued by a Federal department or agency governing the nondisclosure of classified information.

(d) In accordance with Section 743 of Division E, Title VII, of the Consolidated and Further Continuing Appropriations Act, 2015, (Pub. L. 113-235) use of funds appropriated (or otherwise made available) under that or any other Act may be prohibited, if the government determines that the contractor is not in compliance with the provisions of this clause.

(e) The contractor shall include the substance of this clause, including this paragraph (f), in subcontracts under such contracts.

(f) The government may seek any available remedies in the event the contractor fails to comply with the provisions of this clause.

52.217-9 **Option to Extend the Term of the Contract**   (Mar 2000)

(a) The government may extend the term of this contract by written notice to the contractor within **15 days of task order expiration**; provided that the government gives the contractor a preliminary written notice of its intent to extend at least **60 days** before the contract expires. The preliminary notice does not commit the government to an extension.

(b) If the government exercises this option, the extended contract shall be considered to include this option clause.

(c) The total duration of this contract, including the exercise of any options under this clause, shall not exceed **24 months**.

Other Task Order Requirements

1. ADDITIONAL INVOICING INSTRUCTIONS

(a) In accordance with FAR Part 32.905, all invoices submitted to USCIS for payment shall include the following:

(1) Name and address of the contractor.
(2) Invoice date and invoice number.
(3) Contract number or other authorization for supplies delivered or services performed (including order number and contract line item number).
(4) Description, quantity, unit of measure, period of performance, unit price, and extended price of supplies delivered or services performed.
(5) Shipping and payment terms.
(6) Name and address of contractor official to whom payment is to be sent.
(7) Name (where practicable), title, phone number, and mailing address of person to notify in the event of a defective invoice.
(8) Taxpayer Identification Number (TIN).

(b) Invoices not meeting these requirements will be rejected and not paid until a corrected invoice meeting the requirements is received.

(c) USCIS' preferred method for invoice submission is electronically. Invoices shall be submitted in Adobe pdf format with each pdf file containing only one invoice. The pdf files shall be submitted electronically to **USCISInvoice.Consolidation@ice.dhs.gov** with each email conforming to a size limit of 500 KB.

(d) If a paper invoice is submitted, mail the invoice to:

> **USCIS Invoice Consolidation**
> **PO Box 1000**
> **Williston, VT 05495**
> **(802) 288-7600**

(e) On CLIN 0001, if there is rework that needs to be completed on this CLIN, the invoice shall indicate the rate (less any profit).

2. PERFORMANCE REPORTING

The government intends to record and maintain contractor performance information for this task order in accordance with FAR Subpart 42.15. The contractor is encouraged to enroll at www.cpars.gov so it can participate in this process.

3. HSAR CLAUSES INCORPORATED

The following HSAR clauses of the parent EAGLE II Contract apply:

Clause	EAGLE II Section
HSAR clause 3052.204-71	I.4.2
Special Clause – Safeguarding of Sensitive Information (MAR 2015)	H.40
Special Clause – Information Technology Security and Privacy Training (MAR 2015)	H.41

See attachments 5 and 6 for the Special Clauses in full text.

4. POSTING OF ORDER IN FOIA READING ROOM

(a) The government intends to post the order resulting from this notice to a public FOIA reading room.

(b) Within 30 days of award, the contractor shall submit a redacted copy of the executed order (including all attachments) suitable for public posting under the provisions of the Freedom of Information Act (FOIA). The contractor shall submit the documents to the USCIS FOIA Office by email at **foiaerr.nrc@uscis.dhs.gov** with a courtesy copy to the contracting officer.

(c) The USCIS FOIA Office will notify the contractor of any disagreements with the contractor's redactions before public posting of the contract or order in a public FOIA reading room.

5. KEY PERSONNEL

For the purposes of the contract clause at HSAR 3052.215-70, Key Personnel or Facilities, the Key Personnel are listed in Section 4 in the Statement of Work (SOW). All personnel submitted by a contractor to fill a key person billet shall meet required standards per Section 4 of the SOW.

The Key Personnel under this Task Order are:
- Program Manager –
- Solutions Architect/DevOpSec Solutions Architect –

6. NOTICE TO PROCEED (NTP)

(a) Performance of the work requires unescorted access to government facilities or automated systems, and/or access to sensitive but unclassified information. The attachment titled Security Requirements applies.

(b) The contractor is responsible for submitting packages from employees who will receive favorable entry-on-duty (EOD) decisions and suitability determinations, and for submitting them in a timely manner. A government decision to not grant a favorable EOD decision or suitability determination, or to later withdraw or terminate such decision or termination, shall not excuse the contractor from performance of obligations under this task order.

(c) The contractor may submit background investigation packages immediately following task order award.

(d) This task order does not provide for direct payment to the contractor for EOD efforts. Work for which direct payment is not provided is a subsidiary obligation of the contractor. The contracting officer will issue a notice to proceed (NTP) at least one day before full performance is to begin.

(e) The government intends for the Transition-In CLIN to begin no later than **60 days** after task order award (allowing up to 60 days for the EOD period). This initial NTP will not be granted until all Key Personnel have EOD'd. Once the NTP is granted, the 90 day LH transition period will begin.

(f) The government intends for full performance to begin no later than **150** days after task order award (up to 60 days for EOD period plus the 90 day transition period). The contractor is expected to have all staff fully EOD'd prior to beginning full performance.

(g) An NTP will not be issued by the contracting officer until such time as satisfactory suitability determinations have been received and successfully processed by the USCIS Office of Security & Integrity for an entire Data Analytics/DevOpSec team. The NTP shall specifically identify the Contract Line Item Numbers (CLINs) are affected. In this manner, the government can be clear as to which CLINs are in compliance with the SOW in terms of staffing and thus able to begin full performance. If any teams do not have the full number of FTEs ready to begin full performance at that time, the associated CLIN will not be exercised until all personnel are ready to perform.

7. CONSENT TO SUBCONTRACT

For the purposes of the contract clause at FAR 52.244-2, Subcontracts, the fill-in for paragraph (d) is "ALL."

8. EXPECTATION OF CONTRACTOR PERSONNEL

The government expects competent, productive, qualified IT professionals to be assigned to the Data Analytics/DevOpSec Team. The contracting officer may, by written notice to the contractor, require the contractor to remove any employee that is not found to be competent, productive, or a qualified IT professional.

9. FINAL PAYMENT

As a condition precedent to final payment, a release discharging the government, its officers, agents and employees of and from all liabilities, obligations, and claims arising out of or under this order shall be completed. A release of claims will be forwarded to the contractor at the end of each performance period for contractor completion as soon thereafter as practicable.

List of Attachments

Statement of Work
United States Citizenship and Immigration Services (USCIS)
Modernized DevOpSec and Analytics Services (MDAS)

1.   OVERVIEW

USCIS MDAS will be a lightweight, rapid, and flexible procurement for data analytics and Development Operations and Security (DevOpSec) services to support USCIS Information Technology (IT) system delivery.

The USCIS MDAS contractor will provide one (1) Program Management team, and five (5) Data Analytics/DevOpSec teams. The USCIS MDAS teams will perform data analytics and DevOpSec services for USCIS systems hosted in any of the USCIS datacenters or cloud environments. Currently, that environment is located in Amazon Web Services (AWS). The USCIS MDAS teams will provide data analytics capacity, to include at a minimum, the ability to perform fraud detection, monitoring and compliance, to fix data by leveraging new tools in a Big Data Analytics Platforms and to build a Person Centric Service (PCS) for USCIS. The team will include "full stack" expertise and will have the full set of responsibilities for data analytics, development, operations, security, and testing of a set of capabilities in development, test, stage and production environments. The USCIS MDAS contractor will use a Continuous Integration / Continuous Delivery (CI/CD) approach and is expected to adopt cutting edge best practices for IT delivery.

The Government will oversee the architecture and design of the IT capabilities, the Agile methodologies to be used, product planning, and the flow of requirements. The USCIS MDAS contractor will be responsible for developing high-quality IT capabilities working within those architectures and processes to meet the business requirements.

2.   SCOPE

The contractor will engage in many different experiments, projects, and/or efforts to accomplish the following goals: (1) Establish big data reporting and an enterprise analytics platform that will enable USCIS to analyze increasingly larger and more complex data sets. This analysis includes developing machine-learning algorithms to improve how USCIS predicts fraud and processes information to meet USCIS mission needs. (2) Identify and correct data quality issues and establish a data governance framework to enforce data standards and improve accuracy using integrated internal and external disparate data sources. (3) Develop highly optimized, scalable automatic case matching logic on microservice/container technology.

USCIS will manage system roadmaps, project plans, and product and release backlogs that will be the basis for the USCIS MDAS contractor's work and the contractor will support as needed. A USCIS Product Owner will specify high-level requirements to this and other contractors' Agile teams. As in typical Agile processes, USCIS subject matter experts (SMEs) will work together with the USCIS MDAS team to define user stories and establish acceptance criteria.

These acceptance criteria will specify expected functionality for a user story, as well as any non-functional requirements that must be met in the development of the story. The USCIS Product Owners, supported by SMEs and business analysts, will determine whether or not acceptance criteria have been satisfied. USCIS may adopt various Agile processes such as, but not limited to, Extreme Programming (XP), SCRUM, Kanban, and Lean Software Development, and the contractor will be expected to conform its processes to these approaches.

Critical elements of the USCIS MDAS team will be:

- High productivity
- High quality work
- High level of initiative and ownership
- Collaboration and cooperation with other USCIS teams and participants
- Technical skills and expertise as necessary (See Technical Landscape Table and Key Personnel requirements)
- Estimation and planning skills
- Innovation and creativity in problem solving

The contractor shall adopt evolving USCIS design and coding standards in the course of their application development. The contractor shall provide technical methods, techniques, and concepts that are innovative, practical, cost-effective, and conducive to Agile application development. The contractor shall develop IT capabilities based on requirements that are evolving and emerge as the business climate shifts.

The contractor will be required to develop high quality code and are responsible for any technical debt that is incurred as a result of their development activities. The contractor shall balance core productivity with technical debt, and is not expected to use high productivity standards as an excuse for cutting corners. Technical debt shall be addressed as it occurs and shall not become so overwhelming that it must be addressed using an entire or several entire sprints.

Services in support of USCIS MDAS shall be provided by personnel with demonstrated experience in using USCIS specified tools and technologies as described in section *2.1 Technical Landscape*. Each team shall collectively be experienced with all tools and technologies. DevOpSec involves some degree of analysis, requirements collection, design, development, test, platform engineering, and production operations in addition to the support functions of configuration management, planning, and project management. In addition, DevOpSec shall be considered to be "infrastructure as code" with the mindset and practice of automating through code everything possible. The specific tasks applicable under this task order are detailed in section *3 TASKS*. Delivery and operation are expected to follow Agile and DevOpSec industry best practices.

2.1   Technical Landscape

The contractor shall use USCIS enclaves in the AWS public cloud, Department of Homeland Services (DHS) private cloud, and/or other cloud environment specified by the Government, for

development, testing, and production.

The USCIS technical landscape is shifting from a proprietary COTS-based framework to open source. One of USCIS's goals is to use platforms and tools that are familiar to a broad range of developers; this has influenced our selection of open source products and frameworks. All USCIS source code and tests are stored in the agency's Enterprise GitHub repository, and code is shared between different projects where appropriate. USCIS is also moving towards containerized micro-service architecture. The contractor shall provide expertise in this arena.

Currently all work is done in AWS, including development, testing, production, etc. However, some datasets will be within applications hosted within the DHS datacenter. In the future, if USCIS migrates to another cloud provider, the MDAS contractor will be expected to support it. Work performed under this order may include interfacing and sourcing data from applications hosted in a various array of source environments across DHS, government and industry.

The USCIS MDAS task order will use the USCIS standard platform and tools. This platform will evolve over time to continue to fit the needs of USCIS and the contractor will need to embrace and support an ever evolving tool stack. USCIS will expect the vendor to support new or different technologies/tools at any time. The current platform is described in the chart below:

Table 1: Current Tool Suite and Platforms

Name	Function
AWS Cloud	Public cloud platform. USCIS currently uses EC2, S3, ECR, EMR, RedShift, RDS, CloudFormation, Lambda, and a number of other AWS services
Akamai	Content Delivery Network/Web Application Firewall
Amazon Linux	Operating System
Apache ActiveMQ	Messaging Provider
Apache Commons Libs	Java software library
Apache Jmeter	Performance testing
Apache Tomcat	Application server
CentOS	Operating System
Chaos Monkey	Application Resiliency Tool
Chef	Deployment scripting
Cucumber/Jasmine/Selenium	Integration Testing
Customer Care Desktop	UII framework
DeQue FireEyes	508 Development Test tool
Docker	Containerization
Fortify	Security test tool
Git / Enterprise GitHub	Distributed version control
Hibernate 4	ORM Database integration
iText	PDF file generation

Jackson	Java Representation of JSON
Java	Programming Language
Java Mail	Email message generation
JAXB	Java Representation of XML
Jenkins	Continuous integration server
Jira	Agile lifecycle management tool
JUnit	Java Unit testing library
Liquibase	Database automation
Maven	Java artifacts and dependency managements framework
New Relic	Application and Infrastructure Monitoring
Nexus	Repository manager
Oracle & PL/SQL	Database/Reporting
PostgreSQL	Database
Python / Anaconda	Programming Language / Statical Analysis Packages
R / R Studio	Statistical Analysis Software
Rails	Web development framework
rspec	Unit Testing
Ruby	Programming Language
SAS	Statistical Analysis Software
SiteMesh	Java web application framework
SoapUI	WebService Testing tool
Spring Framework	Application Framework
Ubuntu	Operating System
Windows Server	Operating System
BouncyCastle (FIPS)	Crytography API
Kafka	Message Streaming Platform
Snap	Continuous integration and delivery platform
Spark/Scala	Hadoop platform and corresponding programming language
Artifactory	Repository manager
HashiCorp Terraform	Cloud resource creating and management tool
OpenShift	Container Platform

3   TASKS

The contractor teams shall provide expert level ability in the technologies stated in section 2.1 Technical Landscape to perform the following tasks:

3.1 Provide Data Analytics/DevOpSec Teams

The contractor shall provide one Program Management team that consists of two people: one Program Manager (PM) and one Solutions Architect/DevOpSec Architect. The contractor shall provide five Data Analytics/DevOpSec teams. Each team shall be comprised of 10 Full Time Equivalents (FTEs), and shall include a business analyst and a mix of developers, data scientists and cloud engineers. Each team is not required to have the exact same mix of labor categories. Full time personnel are preferred, but part-time personnel will be allowable. The contractor shall

provide at least three Scrum Masters for the task order. Specifically there must be at least one Scrum Master for every two teams. The total number of FTEs for this task order is 52, which is comprised of the two key personnel and five teams comprised of 10 FTE's each.

The teams are responsible for responding to USCIS application development, operations, security, and testing requirements. (Note: the contractor shall use a test driven development (TDD) approach.) The contractor's work shall conform to the architecture and design provided by USCIS and the Agile processes set up by USCIS, but this work will be managed by the contractor teams. The teams must have all of the skills necessary to perform the tasks indicated in the following sections. It is important that the contract personnel assigned to task order as a whole have the skills necessary for development, operations, security, test, and maintenance, but that does **not** mean that specific team members must be designated as testers, coders, etc. Most of the team members shall have more than one skill. It is up to the contractor to structure the teams so that each team can provide all of the necessary functions at a high level of productivity and quality. Each team shall be experienced with the latest systems development technologies, programming languages and the AWS cloud.

As DHS requires Section 508 compliant user interfaces, the contractor shall accredit one person as a Section 508 DHS Trusted Tester for the task order. This individual must be properly vetted and certified at the start of task order performance.

3.2 Development

- Contractor shall be responsible for performing the full suite of DevOpSec tasks using Agile methodologies, including but not limited to, participating in creating user stories for business functionality and technical requirements and defining acceptance criteria
- Contractor shall be responsible for estimating the size of stories, designing solutions, developing code and automated tests, creating deployment scripts, managing code in production, and managing any database solutions.
- Contractor shall test its product and ensure its quality, and shall deploy its code.

3.3 Documentation

- Contractor shall assist in the documentation of user stories, acceptance criteria and tasks to be completed to fulfill the definition of done for a story.
- Contractor shall document system design and procedures in the wiki that USCIS uses for a System Design Document (SDD) concurrent with development activities. In general, USCIS prefers relatively lightweight but effective and usable documentation.

3.4 Design

- Contractor shall participate in the design of technical solutions to meet the business need, working within standards defined by USCIS and subject to review by the agency.
- Contractor will be responsible for designing and implementing user interfaces and for

working with users to maximize the usability of the system. Design will be done in conformance with USCIS design standards and in collaboration with USCIS.

3.5 Test and Integration

- Contractor shall be responsible for creating test cases and automated test scripts to support test automation activities.
- Testing shall primarily be automated, reflecting the best-practice "testing pyramid" with an emphasis on excellent code coverage through unit tests. Unit tests shall cover a minimum of 80% of the code and the contractor shall provide at least monthly reporting on code coverage and technical debt to the government. The build pipeline will also include USCIS standard tools for code standards, test coverage, security testing, and Section 508 compliance.
- The contractor's code shall meet the functional and non-functional requirements, and the automated and manual tests performed shall verify that it does so. Code and tests will be reviewed by USCIS OIT Independent Validation & Verification (IV&V) to ensure that the testing is appropriate, adequate, effective, and that it mitigates key risks.
- Contractor shall use CI/CD techniques. Code shall be deployed to production at least weekly, with preference of daily releases to production in small change sets. The system shall be deployable at any time.
    - Contractor shall deploy features such that the government can decide when the features will be activated.
    - Contractor shall assist with crafting validation steps (both positive and negative testing) for user acceptance testing on an as needed basis.
- Contractor shall perform security scans and automated testing with each build to support ongoing authorization and continuously improved security posture.
- Contractor shall perform automated load and performance testing with every deployment. In addition, the contractor shall provide a mechanism or manage the mechanism to provide regular reporting on application performance.
- Contractor shall perform automated integration testing with all external connections and applications.

3.6 Operations

- Contractor shall be responsible for the operation in production of the capabilities they develop.
- Contractor shall build in monitoring triggers to effectively reveal production issues in a timely fashion.
- Contractor shall provide root cause analysis on all outages with actionable recommendations on how to prevent issues going forward.
- Contractor shall ensure that the system is monitored effectively to reveal any production issues when they occur and to monitor the performance of the application.
- Contractor shall ensure that the systems are monitored effectively to reveal user analytics and interactions and provide the capability to automatically

report on such activities.
- Contractor shall ensure that there is an automated method to monitor for network-related production issues, providing the capability to rule out application issues.
- Primary responsibility for monitoring production systems is held by the USCIS Network Operations Center (NOC). The contractor shall ensure that appropriate monitoring is in place and shall work with the USCIS NOC on monitoring alerts and escalation processes.
- While USCIS expects the quality of the development to not require it, in the event of a critical or high severity production issue, the contractor shall be available to restore system availability and functionality 24 hours a day, seven days a week (24x7).

3.7 Administrative Activities

- Contractor shall collaborate with stakeholders, support contractors, and third party vendors regarding system integration, performance, security, Section 508, system acceptance, user acceptance, usability, and test and evaluation reporting.
- The contractor shall manage all contractor resources and supervise all contractor staff in the performance of work on this task order. The contractor shall manage and coordinate its team(s) on a day-to-day basis and ensure plans are communicated to team members.
- The contractor shall organize, direct and coordinate planning and execution of all task order activities.
- Vehicles for transparency, such as the agency Agile Application Lifecycle Management (ALM) tool, shall be maintained with data so that reports and charts can be generated as needed, and so that user stories, defects, tasks and their status are available to stakeholders. Task boards and collaboration sites, meetings, and demos can be used to share information and report progress.

4 KEY PERSONNEL

The contractor shall identify key personnel and provide statements of qualifications for these individuals. Key personnel shall be current, full time employees of the prime contractor. The contractor shall identify two key personnel for this task order; the **Program Manager** and the **DevOpSec Architect/Solutions Architect**. These individuals must have extensive expertise in the Agile and DevOpSec approaches, and experience using many of the tools included in the Development/Test Tool Suite identified in section 2.1 *Technical Landscape*. Since this is a team-oriented task order, all of the key personnel may have other duties (for example, the Solutions Architect may also act as a developer and the Program Manager might also act as a business analyst, tester, or Scrum Master), as long as they are able to perform their key personnel duties.

The Program Manager shall ensure that all work on this task order complies with terms and conditions and shall have access to contractor corporate senior leadership when necessary. The contractor's Program Manager shall be the primary interface with the USCIS Contracting Officer's Representative (COR) and Contracting Officer (CO) and shall attend status meetings

with stakeholders as required, accompanied by the Solutions Architect or other personnel when necessary.

Key Personnel Minimum Qualifications:

- **Program Manager (Level III)**
    - Must meet EAGLE II Level III requirements.
    - Shall have a minimum of ten (10) years of IT Project Management experience, focusing on development projects.
    - Two (2) years of which include specialized experience in managing IT DevOpSec projects.
    - Experience managing scrum team(s).
- **Solution Architect/DevOpSec Architect (Level III)**
    - Must meet EAGLE II Level III requirements.
    - Shall have a minimum of ten (10) years of experience in the IT field focusing on development projects, DevOpSec and technical architecture specifically.
    - Shall possess strong architecture & design experience (at least 3 of the 10 years) of experience deploying enterprise applications on AWS.
    - Shall possess expertise in large scale, high performance enterprise big data application deployment and solution architecture on complex heterogeneous environments in AWS.

5 TRANSITION SUPPORT

5.1 Transition- In
There will be a 90 day "transition-in" period to transfer responsibilities from either the incumbent contractor or the government to the incoming contractor. Upon notice to proceed, the contractor transition-in will begin with the first sprint in accordance with Agile principles. Knowledge transfer is expected to occur while performing tasks in the Scrum or Kanban process.

5.2 Transition-Out
Upon completion of performance of this task order, the contractor shall fully support the transition of work that is turned over to another entity, either government or a successor offeror(s). The contractor shall assist with transition. To help ensure smooth transition, it is expected that the incoming and outgoing contractors will use techniques such as pair programming to facilitate knowledge sharing without disrupting development. Because the contractor will have automated the development, test, and deployment pipeline, and because the contractor will have documented important design decisions and processes in the SDD, the government will expect the transition to go smoothly and efficiently.

The contractor shall be responsible for the implementation of the transition and application cutover activities. The transition shall cause no disruption in development services. To ensure the necessary continuity of services and to maintain the current level of support, USCIS may retain services of the incumbent contractor for some, or all of, the transition period, as required.

The contractor shall be responsible for the transition of all technical activities identified in this task order. As part of the transition, the contractor shall be responsible for:

- Inventory and orderly transfer of all GFP, to include hardware, software, and licenses, Contractor Acquired Government Property, and Government Furnished Information (GFI)
- Transfer of documentation currently in process
- Transfer of all software code in process
- Certification that all non-public DHS information has been purged from any contractor- owned system
- Exchange of accounts to access software and hosted infrastructure components
- Participation in knowledge transfer activities in accordance with the transition plan
- Providing members to participate in transition of management team

Transition planning generally begins 120 days before the transition deadline. If the government provides a transition plan template, the contractor shall complete it as assigned; otherwise the contractor shall submit a transition plan at the direction of the government. The transition plan shall:
- Document the strategic approach
- Identify equipment, hardware, software, documents and other artifacts that are included in the transition
- Establish milestones and schedules
- Establish activities
- Identify transition risks and risk mitigation
- Define roles and responsibilities
- Define transition approval authorities and lines of communication
- Define appropriate labor mix to perform CI/CD activities
- Define a knowledge transfer approach
- Define a property inventory and transition approach
- Create bi-party or tri-party agreements
- Provide checklists

6   DELIVERABLES

The primary deliverable of this task order is deployed application code. The contractor shall deliver this code throughout the period of performance. Deployed application code is defined as:
- Application Source Code
- Application Build Scripts
- Test Code/Test Cases
- Environment Build Scripts
- Deployment Scripts

All deployed application code shall be checked into the enterprise source code repository. Please note that the test code for automated tests is a critical deliverable: USCIS expects high

test code coverage (a minimum of 80% unit test code coverage) and effective tests, as these will become part of the regression test suite to be used in future development work as well.

The contractor shall deliver system design documentation on the Software Design Document wiki, as well as scripts for manual testing when appropriate.

The contractor shall submit electronic copies of document deliverables to the CO and COR (and others as specified by the CO or COR) via e-mail in the format specified in the table below. All document deliverables shall be made by 4:30pm (EST/EDT), Monday through Friday, unless stated otherwise.

All deliverables submitted in electronic format shall be free of any known computer virus or defects. If a virus or defect is found, the deliverable will not be accepted. The replacement file shall be provided within two business days after notification of the presence of a virus.

6.1   Task Order Management Artifacts

The contractor shall provide reports, such as status briefings, that support task order management, as described below.

As required by the COR, the contractor shall attend meetings with the COR and/or other USCIS stakeholders in order to review work accomplished, work in progress, plans for future work, transition plans and status, and issues pertinent to the performance of work tasks that require USCIS attention.

In the event the government requires additional information related to task order technical or schedule performance, risks, resources, or any task order-related data, the contractor shall provide this report information in the format requested by the government. Requests for reporting may vary in scope and complexity and may require the contractor to attend OIT meetings to obtain required information, review and research applicable documentation, and extract applicable database information.

6.2   Deliverables Schedule

The deliverables that apply to this task order, and that the contractor shall provide, are outlined in *Table 2: Deliverables Schedule*.

<div align="center">Table 2: Deliverables Schedule</div>

Reference	Item	Frequency of Delivery	Acceptable Formats
SOW 5.0	Transition Plan	Following Award	MS Word, Excel
SOW 3.2, 3.5	In-process application code, test code/test cases	Continuously, with each build	Code checked into the USCIS code repository

	deployment scripts, build scripts		
SOW 3.2, 3.5	Shippable application code, test code/test cases deployment scripts, build scripts	Continuously, with each commit	Code checked into the USCIS code repository
SOW 3.3	System Design Document (SDD)	Continuously updated	Wiki
SOW 6.1	Status Briefings, such as presentations, database extractions, meeting reports, burndown charts, etc.	As directed	MS Word, Excel, Visio, or PowerPoint
SOW 3.6	Web Services Logs, ICD and other related deliverables	As directed	MS Word, Excel, Visio or PowerPoint
SOW 1, 3.2	Sprint Review Brief (includes burndown chart, unit testing code coverage, technical debt)	Every two weeks during Sprint Review	PowerPoint, MS Word, Excel, Visio
SOW 6.1	Staffing Report (includes Eroded staff and open billets and status) to COR and ITPM	Weekly for Base Year and then at least monthly thereafter	PowerPoint, MS Word, Excel, Visio
SOW 6.3	Task Order Status Report	As directed by the Government	PowerPoint, MS Word, Excel, Visio
	Redacted copy of the executed task order including all attachments suitable for public posting under the provisions of the Freedom of Information Act (FOIA)	Within 30 days of task order award	Email to foiaerr.nrc@uscis.dhs.gov with a courtesy copy to the CO.
N/A	Separation Notification: The CO and COR must be notified of each contract employee termination/ resignation (The COR will then notify the Office of Security & Integrity (OSI) Personnel	Within five (5) days of each occurrence.	E-mail

	Security Division (PSD) to coordinate the exit clearance forms).		
SOW 5.2	Transition-Out Plan	Within 120 days of task order expiration	MS Word, Excel

6.3   Inspection and Acceptance

Various government stakeholders will inspect contractor services and deliverables. The CO will provide official notification of rejection of deliverables. Inspection and acceptance of deliverables will use the following procedures:

6.3.1   The government will decide whether to accept functionality delivered after it is demonstrated to a government product owner. The product owner and other stakeholders might provide feedback that requires re-work on the contractor's part. This process follows normal Agile software development practices.

6.3.2   The government will also periodically evaluate the contractor's code quality, test coverage, test and deployment code quality, security, and so on. Based on these periodic reviews, the government may require rework on the contractor's part. The government expects high quality work that meets standards specified by the government, and does not expect to find significant problems during these reviews.

7   TASK ORDER ADMINISTRATION DATA

7.1   Place of Performance

The principal place of performance shall be at the contractor provided work site for a minimum of 50% of the staff and the key personnel. For the remaining 50%, the government is amenable to remote workers, as long as the work is completed efficiently and effectively. The contractor facility shall be in close proximity to the USCIS facility at 111 Massachusetts Ave NW, Washington D.C., (must be within 20 miles). Meetings will take place at both the contractor site and USCIS offices in the Washington, D.C. metropolitan area, including 20 Massachusetts Avenue, N.W. and 111 Massachusetts Avenue, N.W., Washington. Meetings may occur at the contractor's work site, especially when close collaboration between stakeholders and the development team is required. The contractor provided workspace shall have workspace, such as a team room, to accommodate up to six government representatives in addition to the contractor personnel. Occasional travel to USCIS offices outside of the Washington, DC area may be contemplated. The government will not reimburse for travel to meetings within the Washington, D.C. metropolitan area.

7.2 Period of Performance

 The period of performance for this task order is a 12 month base period, which includes a 90 day transition period, and a 12 month option period.

7.3 Hours of Operation

Normal duty hours for the Government are from 8:00am to 5:00pm (EST/EDT), Monday through Friday, excluding Federal Government holidays. In addition to normal duty hours, the contractor shall be available to support any outages to the systems on a 24x7 basis. It is the expectation of the government that the systems are built in such a way that they do not go down and therefore this support should be minimal.

7.4 Government Furnished Property (GFP)

GFP laptops will be issued and used in performing work on this task order. No personal or company owned storage devices, (thumb drives, DVDs, or CDs) will be used with the GFP. A webinar account, such as AT&T Connect, will be provided to the contractor to facilitate virtual demos and other meetings with stakeholders at various physical locations. Mobile devices may be provided as identified by the COR or Government Program Manager.

Table 3: Government Furnished Property

Equipment / Government Property	Date / Event Indicate when the GFP will be furnished	Date / Event Indicate when the GFP will be returned	Unit	Unit Acquisition Cost	Quantity	Serial Number(s)	Manufacture & Model Number
Laptop	After EOD	Upon Departure	EA	$2,758	52	TBD	Standard USCIS approved manufacturer
Phone	After EOD	Upon Departure	EA	$500-$650	≤10	TBD	Standard USCIS approved manufacturer

The Contractor is responsible for all costs related to making the property available for use, such as payment of all transportation, installation or rehabilitation costs. The Contractor will be responsible for receipt, stewardship, and custody of the listed GFP until formally relieved of responsibility in accordance with FAR 52.245-1 *Government Property* and FAR 52.245-9 *Use and Charges.* The property may not be used for any non-task order purpose. The Contractor bears full responsibility for any and all loss of this property, whether accidental or purposeful, at full replacement value.

7.5 Government Furnished Information (GFI)

GFI, such as USCIS design standards, will be provided to the contractor following award.

Table 4: Government Furnished Information

Description of Government – Furnished Information	Date/ Event Indicate when the GFI will be furnished	Date/Event Indicate when the GFI will be returned
System access – Contractor staff will be provided access to all DBMS systems' dev-test-stage-pre-prod-prod environments. Staff access levels will be determined based on job duties.	Upon authorized Entry on Duty (EOD)	Access will be terminated upon Contractor departure
DHS, USCIS intranet and email system	Upon authorized EOD	Access will be terminated upon Contractor departure
Access to support systems (JIRA, GitHub, ServiceNow, SPLUNK,etc.)	Upon authorized EOD	Access will be terminated upon Contractor departure
COTS Software in support of development activities (Informatica, OBIEE, Oracle, Erwin, Toad, SAS, SharePoint, PostGres SQL, Liquibase)	Upon authorized EOD	Access will be terminated upon Contractor departure
Systems' historical documentation - design documents, release notes, data models, etc. via the auxiliary systems (SharePoint, JIRA, ITDL, GitHub, etc.)	Upon authorized EOD	Access will be terminated upon Contractor departure
Amazon Web Services (AWS) console access	Upon authorized EOD	Access will be terminated upon Contractor departure

8   PERFORMANCE CRITERIA

8.1 Balanced Scorecard

A Balanced Scorecard approach will be used to evaluate contractor performance. The contractor teams will be evaluated every four weeks and the evaluation will be discussed with the contractor. The purpose of the scorecard and discussions is to enhance performance. In addition, in the aggregate, the scorecards and discussions will be used partially as a basis for past performance reporting.

The relative weights of the evaluation categories will be adjusted by the government based on its experiences, and will be communicated to the contractor after each monthly cycle. The contractor and the CO will receive a copy of the evaluation. Contractors may provide comments or responses to the scorecards to the COR and the CO within one week of receipt of the scorecard and grade.

8.2 Evaluation Dimensions

It is anticipated that the contractor will be evaluated along the following dimensions:

8.2.1 Code Quality and Standards Adherence: Contractor code will be evaluated by government teams and IV&V providers. Code will be evaluated against standards published by USCIS, including design standards and architecture. Automated code review tools will also be used to validate code quality.

8.2.2 Business Satisfaction: Each feature completed by a contractor team will be evaluated by the government product owner for that team, and possibly by SMEs assigned to the team. At each iteration review, the functionality will be evaluated by a wider audience of government employees.

8.2.3 Test Quality and Test Coverage: Test scripts and code will be treated as deliverables. These test scripts and code will be assessed for their quality and for the extent to which they test the appropriate functions. This evaluation will be performed by the IV&V test team or government employees.

8.2.4 Production Performance: The contractor will be evaluated on the performance of their code in production, its availability, response time, usability, accuracy and lack of defects.

8.2.5 Collaboration: USCIS MDAS contractor teams will operate within an ecosystem of federal and contractor staff, with multiple contractor teams working in parallel and with constant interaction with USCIS employees. The contractor will be graded based on their willingness, effort, and ability to work collaboratively.

8.2.6 Productivity: Although measures such as velocity and story point completion cannot be used directly in an Agile process to measure performance, the government will evaluate the value delivered and will also note any unproductive behavior.

8.2.7 Process and Continuous Improvement: USCIS MDAS contractor teams will be assessed on the processes they implement, their conformance to USCIS processes, their conformance with Systems Engineering Life Cycle (SELC) and other required frameworks, and their use of retrospectives to continuously improve these processes.

Capitalized Property, Plant and Equipment (PP&E) Assets Internal Use Software (IUS)

1. Background

The United States Citizenship and Immigration Services Management Directive No. 128-001, USCIS/Office of Information Technology has an ongoing requirement to report Internal Use Software (IUS) costs for the programs under their purview and assignment. This report is a monthly mandatory requirement, and must include all software releases with a cumulative cost of $500K or greater; bulk purchases of $1 Million, and a useful life of 2 years or more.

2. Requirement

Reporting: All applicable charges for application releases and/or development charges are tracked and reported; documented by each applicable release so that an OIT determination can be made if the asset meets IUS criteria. USCIS has determined that the best method for identifying IUS candidates is through monthly collection of contractor cost data for all releases in development, and will capitalize the cost of an IUS project if it is classified as a G-PP&E asset and meets the required criteria.

Definition: IUS is software that is purchased from commercial off-the-shelf (COTS) vendors or ready to use with little or no changes. Internal developed software is developed by employees of USCIS, including new software and existing or purchased software that is modified with or without a contractor's assistance. Contractor-developed software is used to design, program, install, and implement, including new software and the modification of existing or purchased software and related systems, solely to meet the entity's internal or operational needs.

Invoicing and Reporting: The contractor shall identify, capture, log, track and report the costs of IUS associated with each specific release. IUS Software is typically release centric and includes the application and operating system programs, procedures, rules, and any associated documentation pertaining to the operation of a computer system or program.

The contractor shall, after OIT's determination on whether or not the release meets the capitalization criteria, support OIT's reporting of costs incurred for the project or release, as required. The contractor shall provide the nature and cost of work completed within the relevant period. Costs considered part of IUS activities include systems administration, systems engineering, and program management. The Contractor shall provide the total cost, itemized by release and include the total sum of all applicable IUS activities. At the contractor's discretion, this information may be submitted, either as an attachment or as an itemized line item within the monthly invoices, as outlined in *Table 2: Deliverables Schedule.* For information purposes, the following activities within the development lifecycle have been identified as IUS reportable costs by the USCIS Management Directive No. 128-001:

1) Design: System Design: Design System, Update System Test Plan, Update Security Test Plan, Update Project Plan, Update Business Case, Conduct Critical Design Review and Issue Memo.

2) Programming/Construction: Establish Development Environment, Create or Modify Programs, Conduct Unit & Integration Testing, Develop Operator's Manual, Update

Project Plan, Update Business Case, Migration Turnover/Test Readiness Review, Prepare Turnover Package, Develop Test Plans, Migration Turnover/Issue Test Readiness Memo

3) Testing

    a. Acceptance Testing: Develop Security Test Report, Issue Security Certification, Develop System Documentation, Conduct User Acceptance Testing, Update Project Plan, Update Business Case, Conduct Production Readiness Review, Develop Implementation Plan, Issue Production Readiness Review Memo.

    b. Coding

    c. Installation to hardware

    d. Testing, including parallel processing phase

4) Implementation Activities: Implementation/Transition: Security Accreditation (initial system accreditation only), Issue Implementation Notice, Parallel Operations, Update Project Plans, Update Business Case, Conduct Operational Readiness Review, Issue Operational Readiness Memo.

5) In addition, these cost shall contain, if not already itemized in the attachment (PER) or the invoice, the following additional costs information: Full cost (i.e., direct and indirect costs) relating to software development phase; Travel expenses by employees/contractor directly associated with developing software; Documentation Manuals; COTS purchases.

U.S. Citizenship and Immigration Services
Office of Security and Integrity – Personnel Security Division

SECURITY REQUIREMENTS

GENERAL

U.S. Citizenship and Immigration Services (USCIS) has determined that performance of this contract requires that the Contractor, subcontractor(s), vendor(s), etc. (herein known as Contractor), requires access to sensitive but unclassified information, and that the Contractor will adhere to the following.

SUITABILITY DETERMINATION

USCIS shall have and exercise full control over granting, denying, withholding or terminating access of unescorted Contractor employees to government facilities and/or access of Contractor employees to sensitive but unclassified information based upon the results of a background investigation. USCIS may, as it deems appropriate, authorize and make a favorable entry on duty (EOD) decision based on preliminary security checks. The favorable EOD decision would allow the employees to commence work temporarily prior to the completion of the full investigation. The granting of a favorable EOD decision shall not be considered as assurance that a full employment suitability authorization will follow as a result thereof. The granting of a favorable EOD decision or a full employment suitability determination shall in no way prevent, preclude, or bar the withdrawal or termination of any such access by USCIS, at any time during the term of the contract. No Contractor employee shall be allowed unescorted access to a Government facility without a favorable EOD decision or suitability determination by the Office of Security & Integrity Personnel Security Division (OSI PSD).

BACKGROUND INVESTIGATIONS

Contractor employees (to include applicants, temporaries, part-time and replacement employees) under the contract, needing access to sensitive but unclassified information shall undergo a position sensitivity analysis based on the duties each individual will perform on the contract as outlined in the Position Designation Determination (PDD) for Contractor Personnel. The results of the position sensitivity analysis shall identify the appropriate background investigation to be conducted. All background investigations will be processed through OSI PSD.

To the extent the Position Designation Determination form reveals that the Contractor will not require access to sensitive but unclassified information or access to USCIS IT systems, OSI PSD may determine that preliminary security screening and or a complete background investigation is not required for performance on this contract.

Completed packages must be submitted to OSI PSD for prospective Contractor employees no less than 30 days before the starting date of the contract or 30 days prior to EOD of any employees, whether a replacement, addition, subcontractor employee, or vendor. The Contractor shall follow guidelines for package submission as set forth by OSI PSD. A complete package will include the

following forms, in conjunction with security questionnaire submission of the SF-85P, "Security Questionnaire for Public Trust Positions" via e-QIP:

1. DHS Form 11000-6, "Conditional Access to Sensitive But Unclassified Information Non-Disclosure Agreement"

2. FD Form 258, "Fingerprint Card" **(2 copies)**

3. Form DHS 11000-9, "Disclosure and Authorization Pertaining to Consumer Reports Pursuant to the Fair Credit Reporting Act"

4. Position Designation Determination for Contract Personnel Form

5. Foreign National Relatives or Associates Statement

6. OF 306, Declaration for Federal Employment (approved use for Federal Contract Employment)

7. ER-856, "Contract Employee Code Sheet"

EMPLOYMENT ELIGIBILITY

Be advised that unless an applicant requiring access to sensitive but unclassified information has resided in the U.S. for three of the past five years, OSI PSD may not be able to complete a satisfactory background investigation. In such cases, USCIS retains the right to deem an applicant as ineligible due to insufficient background information.

Only U.S. citizens are eligible for employment on contracts requiring access to Department of Homeland Security (DHS) Information Technology (IT) systems or involvement in the development, operation, management, or maintenance of DHS IT systems, unless a waiver has been granted by the Director of USCIS, or designee, with the concurrence of both the DHS Chief Security Officer and the Chief Information Officer or their designees. In instances where non-IT requirements contained in the contract can be met by using Legal Permanent Residents, those requirements shall be clearly described.

The Contractor must agree that each employee working on this contract will have a Social Security Card issued by the Social Security Administration.

CONTINUED ELIGIBILITY

If a prospective employee is found to be ineligible for access to USCIS facilities or information, the Contracting Officer's Representative (COR) will advise the Contractor that the employee shall not continue to work or to be assigned to work under the contract.

In accordance with USCIS policy, contractors are required to undergo a periodic reinvestigation every five years. Security documents will be submitted to OSI PSD within ten business days following notification of a contractor's reinvestigation requirement.

In support of the overall USCIS mission, Contractor employees are required to complete one-time or annual DHS/USCIS mandatory trainings. The Contractor shall certify annually, but no later than

December 31st each year, that required trainings have been completed. The certification of the completion of the trainings by all contractors shall be provided to both the COR and Contracting Officer.

• **USCIS Security Awareness Training** (required within 30 days of entry on duty for new contractors, and annually thereafter)
• **USCIS Integrity Training** (Annually)
• **DHS Continuity of Operations Awareness Training** (one-time training for contractors identified as providing an essential service)
• **USCIS Office Safety Training** (one-time training for contractors working within USCIS facilities; contractor companies may substitute their own training)
• **USCIS Fire Prevention and Safety Training** (one-time training for contractors working within USCIS facilities; contractor companies may substitute their own training)

USCIS reserves the right and prerogative to deny and/or restrict the facility and information access of any Contractor employee whose actions are in conflict with the standards of conduct or whom USCIS determines to present a risk of compromising sensitive but unclassified information and/or classified information.

Contract employees will report any adverse information concerning their personal conduct to OSI PSD. The report shall include the contractor's name along with the adverse information being reported. Required reportable adverse information includes, but is not limited to, criminal charges and or arrests, negative change in financial circumstances, and any additional information that requires admission on the SF-85P security questionnaire.

In accordance with Homeland Security Presidential Directive-12 (HSPD-12) http://www.dhs.gov/homeland-security-presidential-directive-12 contractor employees who require access to United States Citizenship and Immigration Services (USCIS) facilities and/or utilize USCIS Information Technology (IT) systems, must be issued and maintain a Personal Identity Verification (PIV) card throughout the period of performance on their contract. Government-owned contractor-operated facilities are considered USCIS facilities.

After the Office of Security & Integrity, Personnel Security Division has notified the Contracting Officer's Representative that a favorable entry on duty (EOD) determination has been rendered, contractor employees will need to obtain a PIV card.

For new EODs, contractor employees have [*10 business days unless a different number is inserted*] from their EOD date to comply with HSPD-12. For existing EODs, contractor employees have [*10 business days unless a different number of days is inserted*] from the date this clause is incorporated into the contract to comply with HSPD-12.

Contractor employees who do not have a PIV card must schedule an appointment to have one issued. To schedule an appointment:
http://ecn.uscis.dhs.gov/team/mgmt/Offices/osi/FSD/HSPD12/PIV/default.aspx
Contractors who are unable to access the hyperlink above shall contact the Contracting Officer's Representative (COR) for assistance.

Contractor employees who do not have a PIV card will need to be escorted at all times by a government employee while at a USCIS facility and will not be allowed access to USCIS IT systems.

A contractor employee required to have a PIV card shall:

- Properly display the PIV card above the waist and below the neck with the photo facing out so that it is visible at all times while in a USCIS facility
- Keep their PIV card current
- Properly store the PIV card while not in use to prevent against loss or theft
  http://ecn.uscis.dhs.gov/team/mgmt/Offices/osi/FSD/HSPD12/SIR/default.aspx

OSI PSD must be notified of all terminations/ resignations within five days of occurrence. The Contractor will return any expired USCIS issued identification cards and HSPD-12 card, or those of terminated employees to the COR. If an identification card or HSPD-12 card is not available to be returned, a report must be submitted to the COR, referencing the card number, name of individual to whom issued, the last known location and disposition of the card.

SECURITY MANAGEMENT

The Contractor shall appoint a senior official to act as the Corporate Security Officer. The individual will interface with OSI through the COR on all security matters, to include physical, personnel, and protection of all Government information and data accessed by the Contractor.

The COR and OSI shall have the right to inspect the procedures, methods, and facilities utilized by the Contractor in complying with the security requirements under this contract. Should the COR determine that the Contractor is not complying with the security requirements of this contract the Contractor will be informed in writing by the Contracting Officer of the proper action to be taken in order to effect compliance with such requirements.

The Contractor shall be responsible for all damage or injuries resulting from the acts or omissions of their employees and/or any subcontractor(s) and their employees to include financial responsibility.

SECURITY PROGRAM BACKGROUND

The DHS has established a department wide IT security program based on the following Executive Orders (EO), public laws, and national policy:

- Public Law 107-296, Homeland Security Act of 2002.
- Federal Information Security Management Act (FISMA) of 2002, November 25, 2002.
- Public Law 104-106, Clinger-Cohen Act of 1996 [formerly, Information Technology Management Reform Act (ITMRA)], February 10, 1996.

GENERAL

Due to the sensitive nature of USCIS information, the contractor is required to develop and maintain a comprehensive Computer and Telecommunications Security Program to address the integrity, confidentiality, and availability of sensitive but unclassified (SBU) information during collection, storage, transmission, and disposal. The contractor's security program shall adhere to the requirements set forth in the DHS Management Directive 4300 IT Systems Security Pub Volume 1 Part A and DHS Management Directive 4300 IT Systems Security Pub Volume I Part B. This shall include conformance with the DHS Sensitive Systems Handbook, DHS Management Directive 11042 Safeguarding Sensitive but Unclassified (For Official Use Only) Information and other DHS or USCIS guidelines and directives regarding information security requirements. The contractor shall establish a working relationship with the USCIS IT Security Office, headed by the Information Systems Security Program Manager (ISSM).

IT SYSTEMS SECURITY

In accordance with DHS Management Directive 4300.1 "Information Technology Systems Security", USCIS Contractors shall ensure that all employees with access to USCIS IT Systems are in compliance with the requirement of this Management Directive. Specifically, all contractor

employees with access to USCIS IT Systems meet the requirement for successfully completing the annual "Computer Security Awareness Training (CSAT)." All contractor employees are required to complete the training within 60-days from the date of entry on duty (EOD) and are required to complete the training yearly thereafter.

CSAT can be accessed at the following: http://otcd.uscis.dhs.gov/EDvantage.Default.asp or via remote access from a CD which can be obtained by contacting uscisitsecurity@dhs.gov.

IT SECURITY IN THE SYSTEMS DEVELOPMENT LIFE CYCLE (SDLC)

The USCIS SDLC Manual documents all system activities required for the development, operation, and disposition of IT security systems. Required systems analysis, deliverables, and security activities are identified in the SDLC manual by lifecycle phase. The contractor shall assist the appropriate USCIS ISSO with development and completion of all SDLC activities and deliverables contained in the SDLC. The SDLC is supplemented with information from DHS and USCIS Policies and procedures as well as the National Institute of Standards Special Procedures related to computer security and FISMA compliance. These activities include development of the following documents:

- *Sensitive System Security Plan (SSSP)*: This is the primary reference that describes system sensitivity, criticality, security controls, policies, and procedures. The SSSP shall be based upon the completion of the DHS FIPS 199 workbook to categorize the system of application and completion of the RMS Questionnaire. The SSSP shall be completed as part of the System or Release Definition Process in the SDLC and shall not be waived or tailored.
- *Privacy Impact Assessment (PIA) and System of Records Notification (SORN).* For each new development activity, each incremental system update, or system recertification, a PIA and SORN shall be evaluated. If the system (or modification) triggers a PIA the contractor shall support the development of PIA and SORN as required. The Privacy Act of 1974 requires the PIA and shall be part of the SDLC process performed at either System or Release Definition.
- *Contingency Plan (CP)*: This plan describes the steps to be taken to ensure that an automated system or facility can be recovered from service disruptions in the event of emergencies and/or disasters. The Contractor shall support annual contingency plan testing and shall provide a Contingency Plan Test Results Report.
- *Security Test and Evaluation (ST&E)*: This document evaluates each security control and countermeasure to verify operation in the manner intended. Test parameters are established based on results of the RA. An ST&E shall be conducted for each Major Application and each General Support System as part of the certification process. The Contractor shall support this process.
- *Risk Assessment (RA):* This document identifies threats and vulnerabilities, assesses the impacts of the threats, evaluates in-place countermeasures, and identifies additional countermeasures necessary to ensure an acceptable level of security. The RA shall be completed after completing the NIST 800-53 evaluation, Contingency Plan Testing, and the ST&E. Identified weakness shall be documented in a Plan of Action and Milestone (POA&M) in the USCIS Trusted Agent FISMA (TAF) tool. Each POA&M entry shall identify the cost of mitigating the weakness and the schedule for mitigating the weakness, as well as a POC for the mitigation efforts.
- *Certification and Accreditation (C&A):* This program establishes the extent to which a particular design and implementation of an automated system and the facilities housing that system meet a specified set of security requirements, based on the RA of security features

and other technical requirements (certification), and the management authorization and approval of a system to process sensitive but unclassified information (accreditation). As appropriate the Contractor shall be granted access to the USCIS TAF and Risk Management System (RMS) tools to support C&A and its annual assessment requirements. Annual assessment activities shall include completion of the NIST 800-26 Self-Assessment in TAF, annual review of user accounts, and annual review of the FIPS categorization. C&A status shall be reviewed for each incremental system update and a new full C&A process completed when a major system revision is anticipated.

SECURITY ASSURANCES

DHS Management Directives 4300 requires compliance with standards set forth by NIST, for evaluating computer systems used for processing SBU information. The Contractor shall ensure that requirements are allocated in the functional requirements and system design documents to security requirements are based on the DHS policy, NIST standards and applicable legislation and regulatory requirements. Systems shall offer the following visible security features:

- *User Identification and Authentication (I&A)* – I&A is the process of telling a system the identity of a subject (for example, a user) (*I*) and providing that the subject is who it claims to be (*A*). Systems shall be designed so that the identity of each user shall be established prior to authorizing system access, each system user shall have his/her own user ID and password, and each user is authenticated before access is permitted. All system and database administrative users shall have strong authentication, with passwords that shall conform to established DHS standards. All USCIS Identification and Authentication shall be done using the Password Issuance Control System (PICS) or its successor. Under no circumstances will Identification and Authentication be performed by other than the USCIS standard system in use at the time of a systems development.
- *Discretionary Access Control (DAC)* – DAC is a DHS access policy that restricts access to system objects (for example, files, directories, devices) based on the identity of the users and/or groups to which they belong. All system files shall be protected by a secondary access control measure.
- *Object Reuse* – Object Reuse is the reassignment to a subject (for example, user) of a medium that previously contained an object (for example, file). Systems that use memory to temporarily store user I&A information and any other SBU information shall be cleared before reallocation.
- *Audit* – DHS systems shall provide facilities for transaction auditing, which is the examination of a set of chronological records that provide evidence of system and user activity. Evidence of active review of audit logs shall be provided to the USCIS IT Security Office on a monthly basis, identifying all security findings including failed log in attempts, attempts to access restricted information, and password change activity.
- *Banner Pages* – DHS systems shall provide appropriate security banners at start up identifying the system or application as being a Government asset and subject to government laws and regulations. This requirement does not apply to public facing internet pages, but shall apply to intranet applications.

DATA SECURITY

SBU systems shall be protected from unauthorized access, modification, and denial of service. The Contractor shall ensure that all aspects of data security requirements (i.e., confidentiality, integrity, and availability) are included in the functional requirements and system design, and ensure that they meet the minimum requirements as set forth in the DHS Sensitive Systems Handbook and USCIS policies and procedures. These requirements include:

- *Integrity* – The computer systems used for processing SBU shall have data integrity controls to ensure that data is not modified (intentionally or unintentionally) or repudiated by either the sender or the receiver of the information. A risk analysis and vulnerability assessment shall be performed to determine what type of data integrity controls (e.g., cyclical redundancy checks, message authentication codes, security hash functions, and digital signatures, etc.) shall be used.
- *Confidentiality* – Controls shall be included to ensure that SBU information collected, stored, and transmitted by the system is protected against compromise. A risk analysis and vulnerability assessment shall be performed to determine if threats to the SBU exist. If it exists, data encryption shall be used to mitigate such threats.
- *Availability* – Controls shall be included to ensure that the system is continuously working and all services are fully available within a timeframe commensurate with the availability needs of the user community and the criticality of the information processed.
- *Data Labeling.* – The contractor shall ensure that documents and media are labeled consistent with the DHS *Sensitive Systems Handbook*.

INFORMATION TECHNOLOGY SECURITY AND PRIVACY TRAINING (MAR 2015)

(a) Applicability. This clause applies to the Contractor, its subcontractors, and Contractor employees (hereafter referred to collectively as "Contractor"). The Contractor shall insert the substance of this clause in all subcontracts.

(b) Security Training Requirements.

(1) All users of Federal information systems are required by Title 5, Code of Federal Regulations, Part 930.301, Subpart C, as amended, to be exposed to security awareness materials annually or whenever system security changes occur, or when the user's responsibilities change. The Department of Homeland Security (DHS) requires that Contractor employees take an annual Information Technology Security Awareness Training course before accessing sensitive information under the contract. Unless otherwise specified, the training shall be completed within thirty (30) days of contract award and be completed on an annual basis thereafter not later than October 31st of each year. Any new Contractor employees assigned to the contract shall complete the training before accessing sensitive information under the contract. The training is accessible at http://www.dhs.gov/dhs-security-and-training-requirements-contractors. The Contractor shall maintain copies of training certificates for all Contractor and subcontractor employees as a record of compliance. Unless otherwise specified, initial training certificates for each Contractor and subcontractor employee shall be provided to the Contracting Officer's Representative (COR) not later than thirty (30) days after contract award. Subsequent training certificates to satisfy the annual training requirement shall be submitted to the COR via e-mail notification not later than October 31st of each year. The e-mail notification shall state the required training has been completed for all Contractor and subcontractor employees.

(2) The DHS Rules of Behavior apply to every DHS employee, Contractor and subcontractor that will have access to DHS systems and sensitive information. The DHS Rules of Behavior shall be signed before accessing DHS systems and sensitive information. The DHS Rules of Behavior is a document that informs users of their responsibilities when accessing DHS systems and holds users accountable for actions taken while accessing DHS systems and using DHS Information Technology resources capable of inputting, storing, processing, outputting, and/or transmitting sensitive information. The DHS Rules of Behavior is accessible at http://www.dhs.gov/dhs-security-and-training-requirements-contractors. Unless otherwise specified, the DHS Rules of Behavior shall be signed within thirty (30) days of contract award. Any new Contractor employees assigned to the contract shall also sign the DHS Rules of Behavior before accessing DHS systems and sensitive information. The Contractor shall maintain signed copies of the DHS Rules of Behavior for all Contractor and subcontractor employees as a record of compliance. Unless otherwise specified, the Contractor shall e-mail

copies of the signed DHS Rules of Behavior to the COR not later than thirty (30) days after contract award for each employee. The DHS Rules of Behavior will be reviewed annually and the COR will provide notification when a review is required.

(c) Privacy Training Requirements. All Contractor and subcontractor employees that will have access to Personally Identifiable Information (PII) and/or Sensitive PII (SPII) are required to take Privacy at DHS: Protecting Personal Information before accessing PII and/or SPII. The training is accessible at http://www.dhs.gov/dhs-security-and-training-requirements-contractors. Training shall be completed within thirty (30) days of contract award and be completed on an annual basis thereafter not later than October 31st of each year. Any new Contractor employees assigned to the contract shall also complete the training before accessing PII and/or SPII. The Contractor shall maintain copies of training certificates for all Contractor and subcontractor employees as a record of compliance. Initial training certificates for each Contractor and subcontractor employee shall be provided to the COR not later than thirty (30) days after contract award. Subsequent training certificates to satisfy the annual training requirement shall be submitted to the COR via e-mail notification not later than October 31st of each year. The email notification shall state the required training has been completed for all Contractor and subcontractor employees.

(End of clause)

SAFEGUARDING OF SENSITIVE INFORMATION (MAR 2015)

(a) *Applicability.* This clause applies to the Contractor, its subcontractors, and Contractor employees (hereafter referred to collectively as "Contractor"). The Contractor shall insert the substance of this clause in all subcontracts.

(b) *Definitions.* As used in this clause—

"Personally Identifiable Information (PII)" means information that can be used to distinguish or trace an individual's identity, such as name, social security number, or biometric records, either alone, or when combined with other personal or identifying information that is linked or linkable to a specific individual, such as date and place of birth, or mother's maiden name. The definition of PII is not anchored to any single category of information or technology. Rather, it requires a case-by-case assessment of the specific risk that an individual can be identified. In performing this assessment, it is important for an agency to recognize that non-personally identifiable information can become personally identifiable information whenever additional information is made publicly available—in any medium and from any source—that, combined with other available information, could be used to identify an individual.

PII is a subset of sensitive information. Examples of PII include, but are not limited to: name, date of birth, mailing address, telephone number, Social Security number (SSN), email address, zip code, account numbers, certificate/license numbers, vehicle identifiers including license plates, uniform resource locators (URLs), static Internet protocol addresses, biometric identifiers such as fingerprint, voiceprint, iris scan, photographic facial images, or any other unique identifying number or characteristic, and any information where it is reasonably foreseeable that the information will be linked with other information to identify the individual.

"Sensitive Information" is defined in HSAR clause 3052.204-71, Contractor Employee Access, as any information, which if lost, misused, disclosed, or, without authorization is accessed, or modified, could adversely affect the national or homeland security interest, the conduct of Federal programs, or the privacy to which individuals are entitled under section 552a of Title 5, United States Code (the Privacy Act), but which has not been specifically authorized under criteria established by an Executive Order or an Act of Congress to be kept secret in the interest of national defense, homeland security or foreign policy. This definition includes the following categories of information:

(1) Protected Critical Infrastructure Information (PCII) as set out in the Critical Infrastructure Information Act of 2002 (Title II, Subtitle B, of the Homeland Security Act, Public Law 107-296, 196 Stat. 2135), as amended, the implementing regulations thereto (Title 6, Code of Federal Regulations, Part 29) as amended, the applicable PCII Procedures Manual, as amended, and any supplementary guidance officially communicated by an authorized official of the Department of Homeland Security (including the PCII Program Manager or his/her designee);

(2) Sensitive Security Information (SSI), as defined in Title 49, Code of Federal Regulations, Part 1520, as amended, "Policies and Procedures of Safeguarding and Control of SSI," as amended, and any supplementary guidance officially communicated by an authorized official of the Department of Homeland Security (including the Assistant Secretary for the Transportation Security Administration or his/her designee);

(3) Information designated as "For Official Use Only," which is unclassified information of a sensitive nature and the unauthorized disclosure of which could adversely impact a person's privacy or welfare, the conduct of Federal programs, or other programs or operations essential to the national or homeland security interest; and

(4) Any information that is designated "sensitive" or subject to other controls, safeguards or protections in accordance with subsequently adopted homeland security information handling procedures.

"Sensitive Information Incident" is an incident that includes the known, potential, or suspected exposure, loss of control, compromise, unauthorized disclosure, unauthorized acquisition, or unauthorized access or attempted access of any Government system, Contractor system, or sensitive information.

"Sensitive Personally Identifiable Information (SPII)" is a subset of PII, which if lost, compromised or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. Some forms of PII are sensitive as stand-alone elements. Examples of such PII include: Social Security numbers (SSN), driver's license or state identification number, Alien Registration Numbers (A-number), financial account number, and biometric identifiers such as fingerprint, voiceprint, or iris scan. Additional examples include any groupings of information that contain an individual's name or other unique identifier plus one or more of the following elements:

(1) Truncated SSN (such as last 4 digits)
(2) Date of birth (month, day, and year)
(3) Citizenship or immigration status
(4) Ethnic or religious affiliation
(5) Sexual orientation
(6) Criminal History
(7) Medical Information
(8) System authentication information such as mother's maiden name, account passwords or personal identification numbers (PIN)

Other PII may be "sensitive" depending on its context, such as a list of employees and their performance ratings or an unlisted home address or phone number. In contrast, a business card or public telephone directory of agency employees contains PII but is not sensitive.

(c) *Authorities.* The Contractor shall follow all current versions of Government policies and guidance accessible at http://www.dhs.gov/dhs-security-and-training-requirements-contractors, or available upon request from the Contracting Officer, including but not limited to:

(1) DHS Management Directive 11042.1 Safeguarding Sensitive But Unclassified (for Official Use Only) Information
(2) DHS Sensitive Systems Policy Directive 4300A
(3) DHS 4300A Sensitive Systems Handbook and Attachments
(4) DHS Security Authorization Process Guide

(5) DHS Handbook for Safeguarding Sensitive Personally Identifiable Information
(6) DHS Instruction Handbook 121-01-007 Department of Homeland Security Personnel
Suitability and Security Program
(7) DHS Information Security Performance Plan (current fiscal year) (8) DHS Privacy Incident
Handling Guidance
(9) Federal Information Processing Standard (FIPS) 140-2 Security Requirements for
Cryptographic Modules accessible at http://csrc.nist.gov/groups/STM/cmvp/standards.html
(10) National Institute of Standards and Technology (NIST) Special Publication 800-53 Security
and Privacy Controls for Federal Information Systems and Organizations accessible at
http://csrc.nist.gov/publications/PubsSPs.html
(11) NIST Special Publication 800-88 Guidelines for Media Sanitization accessible at
http://csrc.nist.gov/publications/PubsSPs.html

(d) *Handling of Sensitive Information.* Contractor compliance with this clause, as well as the
policies and procedures described below, is required.

(1) Department of Homeland Security (DHS) policies and procedures on Contractor personnel
security requirements are set forth in various Management Directives (MDs), Directives, and
Instructions. *MD 11042.1, Safeguarding Sensitive But Unclassified (For Official Use Only)
Information* describes how Contractors must handle sensitive but unclassified information. DHS
uses the term "FOR OFFICIAL USE ONLY" to identify sensitive but unclassified information
that is not otherwise categorized by statute or regulation. Examples of sensitive information that
are categorized by statute or regulation are PCII, SSI, etc. The *DHS Sensitive Systems Policy
Directive 4300A* and the *DHS 4300A Sensitive Systems Handbook* provide the policies and
procedures on security for Information Technology (IT) resources. The *DHS Handbook for
Safeguarding Sensitive Personally Identifiable Information* provides guidelines to help safeguard
SPII in both paper and electronic form. *DHS Instruction Handbook 121-01-007 Department of
Homeland Security Personnel Suitability and Security Program* establishes procedures, program
responsibilities, minimum standards, and reporting protocols for the DHS Personnel Suitability
and Security Program.

(2) The Contractor shall not use or redistribute any sensitive information processed, stored,
and/or transmitted by the Contractor except as specified in the contract.

(3) All Contractor employees with access to sensitive information shall execute *DHS Form
11000-6, Department of Homeland Security Non-Disclosure Agreement (NDA)*, as a condition of
access to such information. The Contractor shall maintain signed copies of the NDA for all
employees as a record of compliance. The Contractor shall provide copies of the signed NDA to
the Contracting Officer's Representative (COR) no later than two (2) days after execution of the
form.

(4) The Contractor's invoicing, billing, and other recordkeeping systems maintained to support
financial or other administrative functions shall not maintain SPII. It is acceptable to maintain in
these systems the names, titles and contact information for the COR or other Government
personnel associated with the administration of the contract, as needed.

(e) *Authority to Operate*. The Contractor shall not input, store, process, output, and/or transmit sensitive information within a Contractor IT system without an Authority to Operate (ATO) signed by the Headquarters or Component CIO, or designee, in consultation with the Headquarters or Component Privacy Officer. Unless otherwise specified in the ATO letter, the ATO is valid for three (3) years. The Contractor shall adhere to current Government policies, procedures, and guidance for the Security Authorization (SA) process as defined below.

(1) *Complete the Security Authorization process.* The SA process shall proceed according to the *DHS Sensitive Systems Policy Directive 4300A* (Version 11.0, April 30, 2014), or any successor publication, *DHS 4300A Sensitive Systems Handbook* (Version 9.1, July 24, 2012), or any successor publication, and the *Security Authorization Process Guide* including templates.

> (i)   Security Authorization Process Documentation. SA documentation shall be developed using the Government provided Requirements Traceability Matrix and Government security documentation templates. SA documentation consists of the following: Security Plan, Contingency Plan, Contingency Plan Test Results, Configuration Management Plan, Security Assessment Plan, Security Assessment Report, and Authorization to Operate Letter. Additional documents that may be required include a Plan(s) of Action and Milestones and Interconnection Security Agreement(s). During the development of SA documentation, the Contractor shall submit a signed SA package, validated by an independent third party, to the COR for acceptance by the Headquarters or Component CIO, or designee, at least thirty (30) days prior to the date of operation of the IT system. The Government is the final authority on the compliance of the SA package and may limit the number of resubmissions of a modified SA package. Once the ATO has been accepted by the Headquarters or Component CIO, or designee, the Contracting Officer shall incorporate the ATO into the contract as a compliance document. The Government's acceptance of the ATO does not alleviate the Contractor's responsibility to ensure the IT system controls are implemented and operating effectively.

> (ii)   Independent Assessment. Contractors shall have an independent third party validate the security and privacy controls in place for the system(s). The independent third party shall review and analyze the SA package, and report on technical, operational, and management level deficiencies as outlined in *NIST Special Publication 800-53 Security and Privacy Controls for Federal Information Systems and Organizations*. The Contractor shall address all deficiencies before submitting the SA package to the Government for acceptance.

> (iii) Support the completion of the Privacy Threshold Analysis (PTA) as needed. As part of the SA process, the Contractor may be required to support the Government in the completion of the PTA. The requirement to complete a PTA is triggered by the creation, use, modification, upgrade, or disposition of a Contractor IT system that will store, maintain and use PII, and must be renewed at least every three (3) years. Upon review of the PTA, the DHS Privacy Office determines whether a Privacy Impact Assessment (PIA) and/or Privacy Act System of Records Notice (SORN), or modifications thereto, are required. The Contractor shall provide all support necessary to assist the Department in completing the PIA in a timely manner and shall ensure that project management plans

and schedules include time for the completion of the PTA, PIA, and SORN (to the extent required) as milestones. Support in this context includes responding timely to requests for information from the Government about the use, access, storage, and maintenance of PII on the Contractor's system, and providing timely review of relevant compliance documents for factual accuracy. Information on the DHS privacy compliance process, including PTAs, PIAs, and SORNs, is accessible at http://www.dhs.gov/privacy-compliance.

(2) *Renewal of ATO.* Unless otherwise specified in the ATO letter, the ATO shall be renewed every three (3) years. The Contractor is required to update its SA package as part of the ATO renewal process. The Contractor shall update its SA package by one of the following methods: (1) Updating the SA documentation in the DHS automated information assurance tool for acceptance by the Headquarters or Component CIO, or designee, at least 90 days before the ATO expiration date for review and verification of security controls; or (2) Submitting an updated SA package directly to the COR for approval by the Headquarters or Component CIO, or designee, at least 90 days before the ATO expiration date for review and verification of security controls. The 90 day review process is independent of the system production date and therefore it is important that the Contractor build the review into project schedules. The reviews may include onsite visits that involve physical or logical inspection of the Contractor environment to ensure controls are in place.

(3) *Security Review.* The Government may elect to conduct random periodic reviews to ensure that the security requirements contained in this contract are being implemented and enforced. The Contractor shall afford DHS, the Office of the Inspector General, and other Government organizations access to the Contractor's facilities, installations, operations, documentation, databases and personnel used in the performance of this contract. The Contractor shall, through the Contracting Officer and COR, contact the Headquarters or Component CIO, or designee, to coordinate and participate in review and inspection activity by Government organizations external to the DHS. Access shall be provided, to the extent necessary as determined by the Government, for the Government to carry out a program of inspection, investigation, and audit to safeguard against threats and hazards to the integrity, availability and confidentiality of Government data or the function of computer systems used in performance of this contract and to preserve evidence of computer crime.

(4) *Continuous Monitoring.* All Contractor-operated systems that input, store, process, output, and/or transmit sensitive information shall meet or exceed the continuous monitoring requirements identified in the *Fiscal Year 2014 DHS Information Security Performance Plan*, or successor publication. The plan is updated on an annual basis. The Contractor shall also store monthly continuous monitoring data at its location for a period not less than one year from the date the data is created. The data shall be encrypted in accordance with *FIPS 140-2 Security Requirements for Cryptographic Modules* and shall not be stored on systems that are shared with other commercial or Government entities. The Government may elect to perform continuous monitoring and IT security scanning of Contractor systems from Government tools and infrastructure.

(5) *Revocation of ATO.* In the event of a sensitive information incident, the Government may suspend or revoke an existing ATO (either in part or in whole). If an ATO is suspended or revoked in accordance with this provision, the Contracting Officer may direct the Contractor to take additional security measures to secure sensitive information. These measures may include

restricting access to sensitive information on the Contractor IT system under this contract. Restricting access may include disconnecting the system processing, storing, or transmitting the sensitive information from the Internet or other networks or applying additional security controls.

(6) *Federal Reporting Requirements*. Contractors operating information systems on behalf of the Government or operating systems containing sensitive information shall comply with Federal reporting requirements. Annual and quarterly data collection will be coordinated by the Government. Contractors shall provide the COR with requested information within three (3) business days of receipt of the request. Reporting requirements are determined by the Government and are defined in the *Fiscal Year 2014 DHS Information Security Performance Plan*, or successor publication. The Contractor shall provide the Government with all information to fully satisfy Federal reporting requirements for Contractor systems.

(f) *Sensitive Information Incident Reporting Requirements*.

(1) All known or suspected sensitive information incidents shall be reported to the Headquarters or Component Security Operations Center (SOC) within one hour of discovery in accordance with *4300A Sensitive Systems Handbook Incident Response and Reporting* requirements. When notifying the Headquarters or Component SOC, the Contractor shall also notify the Contracting Officer, COR, Headquarters or Component Privacy Officer, and US-CERT using the contact information identified in the contract. If the incident is reported by phone or the Contracting Officer's email address is not immediately available, the Contractor shall contact the Contracting Officer immediately after reporting the incident to the Headquarters or Component SOC. The Contractor shall not include any sensitive information in the subject or body of any e-mail. To transmit sensitive information, the Contractor shall use *FIPS 140-2 Security Requirements for Cryptographic Modules* compliant encryption methods to protect sensitive information in attachments to email. Passwords shall not be communicated in the same email as the attachment. A sensitive information incident shall not, by itself, be interpreted as evidence that the Contractor has failed to provide adequate information security safeguards for sensitive information, or has otherwise failed to meet the requirements of the contract.

(2) If a sensitive information incident involves PII or SPII, in addition to the reporting requirements in *4300A Sensitive Systems Handbook Incident Response and Reporting,* Contractors shall also provide as many of the following data elements that are available at the time the incident is reported, with any remaining data elements provided within 24 hours of submission of the initial incident report:
> (i) Data Universal Numbering System (DUNS);
> (ii) Contract numbers affected unless all contracts by the company are affected;
> (iii) Facility CAGE code if the location of the event is different than the prime contractor location;
> (iv) Point of contact (POC) if different than the POC recorded in the System for Award Management (address, position, telephone, email);
> (v) Contracting Officer POC (address, telephone, email);
> (vi) Contract clearance level;
> (vii) Name of subcontractor and CAGE code if this was an incident on a subcontractor network;
> (viii) Government programs, platforms or systems involved;
> (ix) Location(s) of incident;

(x) Date and time the incident was discovered;

(xi) Server names where sensitive information resided at the time of the incident, both at the Contractor and subcontractor level;

(xii) Description of the Government PII and/or SPII contained within the system;

(xiii) Number of people potentially affected and the estimate or actual number of records exposed and/or contained within the system; and

(xiv) Any additional information relevant to the incident.

(g) *Sensitive Information Incident Response Requirements.*

(1) All determinations related to sensitive information incidents, including response activities, notifications to affected individuals and/or Federal agencies, and related services (e.g., credit monitoring) will be made in writing by the Contracting Officer in consultation with the Headquarters or Component CIO and Headquarters or Component Privacy Officer.

(2) The Contractor shall provide full access and cooperation for all activities determined by the Government to be required to ensure an effective incident response, including providing all requested images, log files, and event information to facilitate rapid resolution of sensitive information incidents.

(3) Incident response activities determined to be required by the Government may include, but are not limited to, the following:

(i) Inspections,

(ii) Investigations,

(iii) Forensic reviews, and

(iv) Data analyses and processing.

(4) The Government, at its sole discretion, may obtain the assistance from other Federal agencies and/or third-party firms to aid in incident response activities.

(h) *Additional PII and/or SPII Notification Requirements.*

(1) The Contractor shall have in place procedures and the capability to notify any individual whose PII resided in the Contractor IT system at the time of the sensitive information incident not later than 5 business days after being directed to notify individuals, unless otherwise approved by the Contracting Officer. The method and content of any notification by the Contractor shall be coordinated with, and subject to prior written approval by the Contracting Officer, in consultation with the Headquarters or Component Privacy Officer, utilizing the *DHS Privacy Incident Handling Guidance.* The Contractor shall not proceed with notification unless the Contracting Officer, in consultation with the Headquarters or Component Privacy Officer, has determined in writing that notification is appropriate.

(2) Subject to Government analysis of the incident and the terms of its instructions to the Contractor regarding any resulting notification, the notification method may consist of letters to affected individuals sent by first class mail, electronic means, or general public notice, as approved by the Government. Notification may require the Contractor's use of address verification and/or address location services. At a minimum, the notification shall include:

(i) A brief description of the incident;

(ii) A description of the types of PII and SPII involved;

(iii) A statement as to whether the PII or SPII was encrypted or protected by other means;

(iv) Steps individuals may take to protect themselves;

(v) What the Contractor and/or the Government are doing to investigate the incident, to mitigate the incident, and to protect against any future incidents; and
(vi) Information identifying who individuals may contact for additional information.

(i) *Credit Monitoring Requirements.* In the event that a sensitive information incident involves PII or SPII, the Contractor may be required to, as directed by the Contracting Officer:

(1) Provide notification to affected individuals as described above; and/or

(2) Provide credit monitoring services to individuals whose data was under the control of the Contractor or resided in the Contractor IT system at the time of the sensitive information incident for a period beginning the date of the incident and extending not less than 18 months from the date the individual is notified. Credit monitoring services shall be provided from a company with which the Contractor has no affiliation. At a minimum, credit monitoring services shall include:
    (i) Triple credit bureau monitoring;
    (ii) Daily customer service;
    (iii) Alerts provided to the individual for changes and fraud; and
    (iv) Assistance to the individual with enrollment in the services and the use of fraud alerts; and/or

(3) Establish a dedicated call center. Call center services shall include:

    (i) A dedicated telephone number to contact customer service within a fixed period;
    (ii) Information necessary for registrants/enrollees to access credit reports and credit scores;

    (iii) Weekly reports on call center volume, issue escalation (i.e., those calls that cannot be handled by call center staff and must be resolved by call center management or DHS, as appropriate), and other key metrics;

    (iv) Escalation of calls that cannot be handled by call center staff to call center management or DHS, as appropriate;

    (v) Customized FAQs, approved in writing by the Contracting Officer in coordination with the Headquarters or Component Chief Privacy Officer; and
    (vi) Information for registrants to contact customer service representatives and fraud resolution representatives for credit monitoring assistance.

(j) *Certification of Sanitization of Government and Government-Activity-Related Files and Informatio*n. As part of contract closeout, the Contractor shall submit the certification to the COR and the Contracting Officer following the template provided in *NIST Special Publication 800-88 Guidelines for Media Sanitization.*
